DETAILED ACTION

Status of Claims

1. Claims 1-11 are pending.

Claims 1-11 are rejected.

2. The disclosure is objected to because of the following informalities:

a) Example 1.5 (comparison) makes reference to itself (see page 13, line 6).

b) In Example 1.3 (according to the present invention), the time to reach the metering rate for the starter substance exceeds the metering rate disclosed in other parts of the specification and the claims, i.e. the example discloses a time of 600 seconds whereas the other parts of the specification and the claims time does not exceed 500 seconds.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Connor et al. (US 6,359,101 B1).

The instant claims are directed to a process for preparing polyether polyols

wherein specific times to reach the metering rate are required. These times are disclosed in the specification as necessary to reach a steady-state operation quickly without deactivation of the catalyst.

O'Conner et al. teach the instant invention (see entire disclosure, in particular column 6, lines 19-53; column 7, line 10 to column 15, line 48; note (3) under Table 3; and Table 6).
